

Multimedia **Guiding** System

MEDER SmartGuide[®]

Worldwide innovation: Android based Guiding System

- **GroupGuide-System:**
guided group tours
- **AudioGuide-System:**
exploring the city, the museum
or factory independently
- **VisualGuide-System:**
visual support of the
guided tour

The **MEDER SmartGuide** is the world's first device that combines the following guide system functions and that is using the Standard-Radio frequencies in the Guiding function :

- **GroupGuide-System:**
guided group tours
- **AudioGuide-System:**
exploring the city, the museum or factory independently
- **VisualGuide-System:**
Visual support of the guided tour

Thanks to the accuracy of GPS positioning, a problem free orientation is ensured at any time. The **MEDER SmartGuide** indicates which sight the visitor is looking at, and the accompanying audio-, picture-, text- and videoinformation starts in the preset language after a short acoustic signal.

The **MEDER SmartGuide** has a simple menu navigation that is easy to use and suitable for all age groups. Icons have been specially developed to help the user to choose between the Group-Guide- and the CityGuide-System, and between further features. The change between RiverTour- and CityGuide-System happens automatically via GPS.

The **MEDER SmartGuide** can be adjusted to individual corporate designs, and it can be outfitted with customer specific functions like an OnBoard-Communication System, statistics or a messaging function.

We offer a comprehensive service range for professional rental businesses, including Europe wide delivery of devices and earphones.

Features

- Bluetooth, GPS and WLAN capable
